Project Title: Personal Finance Dashboard

Features:

- Add income & expenses

- Category-wise summary

- Monthly dashboard view

- Store data using Local Storage

- Interactive UI using JS

Objective:

To develop a personal finance dashboard that helps users track income, expenses, and balance in an interactive way.

Tools Used:

- HTML

- CSS

- JavaScript

- Local Storage

Features:

- Users can add income and expense entries

- Dashboard summarizes data by category

- Monthly summary available

- Interactive and user-friendly UI

- Data persists using browser local storage

Screenshots:

- Screenshot 1 Dashboard overview

- Screenshot 2: Transaction list

Conclusion:

This advanced project demonstrates a full-featured, interactive finance dashboard using JavaScript and Local Storage to manage user data efficiently.
