Project Title: Mood-Based Music Suggestion App

Requirements:

- Dropdown to select mood

- Display playlist based on mood

- Use JavaScript DOM

- Theme color changes dynamically

Objective:

To create an interactive web application that suggests music playlists based on the user's mood.

Tools Used:

- HTML

- CSS

- JavaScript (DOM manipulation)

Features:

- User can select a mood from dropdown

- Playlist updates dynamically based on selected mood

- Theme color changes according to mood

- Simple and intuitive interface

Screenshots:

- Screenshot 1 Mood selection dropdown

- Screenshot 2: Playlist displayed dynamically

Conclusion:

This medium-level project demonstrates the use of JavaScript DOM to create an interactive and dynamic web application for music suggestions.
